Terrazza Originale patio roof

Enjoy life al fresco

Enjoy your patio until well into autumn – weinor’s Terrazza Originale patio roof will keep you well sheltered from the wind and other elements. And your patio furniture can remain outside without being damaged. The appeal of weinor’s patio roof is its elegant construction, attractively shaped design and high durability. With numerous versions available, it is also very suited to many different types of houses and requirements.

Frame colour RAL 9016

160 guttering

220 guttering

The very best patio roof for any application – and completely bespoke

Every weinor patio roof/veranda is of the highest quality. The stable aluminium construction is powder coated using a state of the art process and there are over 200 frame colours available to choose from. Alongside the use of the very highest quality stainless steel screws there is maximum resistance to corrosion. The result is a roof that can be enjoyed for many years trouble free. The special gutter construction allows unobstructed views of the outside as widths of up to 7 metres can be achieved without the need for additional posts in the middle.

Terrazza Originale – Highlights and versions

Elegant design – as if from one casting

The weinor Terrazza Originale patio roof captivates through its harmonious design. The elegant yet rigid construction is thought out down to the finest detail:

- almost all fixings are concealed for a clean appearance
- corrosion-resistant with powder coated aluminium profiles and stainless steel screws

Rigid roof covering – resilient and shatter-proof

The weinor Terrazza is designed for use with high quality for high-quality laminated safety glass (LSG):

- glazing can be 10 or 12 mm LSG
- if required, the roof can carry a snow load from 75 N/m² up to 550 N/m²

Rigid aluminium construction

The Terrazza Originale stands out for its exceptional stability and durability. All patio roofs meet the standards and specifications and are designed to withstand wind and snow burdens according to static calculations.

- sturdy roof supports in a variety of configurations
- extra-thick walls in a slim structure
- steel inserts optionally available, also as guttering reinforcements if required
- roof depths up to 6 m

115 post

90 post

Invisibly integrated drainage

Rainwater is efficiently drained away by the discretely integrated gutters and drainage outlets inside the post. The drainage outlet can also be positioned at the end of the gutter profile. The optional foliage screen prevents the ingress of leaves

and the like into the rain gutter. There is a choice of two post styles – 115 post (square) and 90 post (round). So the best match can be made to either the existing surroundings or simply a preferred style.

220 guttering – large spans without middle posts

Anyone spending time under a patio roof wants to enjoy an unobstructed view. With the 220 guttering combined with

the 115 post, larger spans are also feasible without middle posts, so nothing obstructs the view.

Terrazza Originale/Plus – Roof types and accessories

Two roof models – equipped exactly the way you need them

To ensure that the roof is a perfect match for the facade it is fitting to, there are several different options and roof types to choose from (see p. 11).

Patio roof without overhang, with integrated guttering

The basic model comes in a classic lean to design: if you don't need an additional roof overhang, you will find the **Terrazza Originale** a good solution.

Patio roof with roof overhang and integrated guttering

Or opt for a **Terrazza Originale Plus** with roof overhang and integrated downspout – to make sure the rain drains off as it should.

Attractive post forms – square or round

The posts of the Terrazza Originale/Plus are available in square or round design. So there is the right patio roof for every building type, no matter if classic or modern. You can choose between 200 RAL frame colours to match any current trend or existing colour scheme.

Patio roof with post 115 (square)

Patio roof with post 90 (round)

Circumferential pent roof – Type N

Contact your weinor retailer for advice!

weinor patio roofs and Glasoasen® blend in to the shape and appearance of any building facade – even on protruding walls and corner solutions. Your weinor retailer will be happy to explain to you which style of roof is suitable for your needs. Most roof models and types can be very easily combined with weinor glazed elements.

Matching side glazing – tailored to your needs and wishes

Maximum transparency: SUPER LITE side element w50-c

Adding fixed glazing below the side roof support opens up the possibility to include fully-transparent front panels – with not a single vertical or horizontal strut in sight.

Complements the full glass sliding door: LITE side element

Lightweight fixed glazing at the top of the trapezium, with a weinor full glass sliding wall below – if you go this way, you'll be choosing a very popular combination!

As stable as they come: CLASSIC side element

Or go for sturdy fixed glazing at the top of the trapezium, with a full glass sliding door below – or even framed fixed glazing to hold off strong side winds if you prefer.

weinor Glasoase® Light-flooded elegance

Bring your garden into your house – with the elegant weinor Glasoase® that offers you smooth transitions to the outside. This glass oasis is a combination of a Terrazza Originale patio roof comprising all-glass elements that can be closed to form an uninsulated conservatory. The many flexible and fixed-glazed side elements allow for any number of possible combinations. To see our roof shapes, please go to p. 11.

w17 easy The effortless full glass sliding door

Whether you want it protected and cozy or fresh and airy: With the frameless glass sliding door w17 easy you will always experience pure living pleasure – on your patio. It could not be simpler – thanks to premium fitting technology, the glass sliding door from weinor can be easily operated and locked if required.

Honoured with:

Full glass sliding door w17 easy

Highlights, features and benefits

Soft-Closing-System

The w17 easy full glass sliding door is supplied as standard with the Soft-Closing-System. It allows for the extremely quiet and easy movement of the glass leaves. The system also comes with high-quality stainless steel

rollers and guide rails. In addition, all the leaf actuators, leaf stop bars are fitted with softer cushioning elements at the end positions and on the wall gap sealing profiles.

Lockplate version – opens on two sides, closes in the centre

Single system – opens on one or two sides, closes on the left and/or right

Corner unit – frameless full glass corner, e.g. for balconies and loggias

Technical data

w17 easy full glass sliding door

	Single system	Lockplate version

Brushes and gap seals	Option	Option
Soft-Closing-System	Standard	Standard
Corner unit	90°	90°

* As of a system height of 2.4 m, version w17 easy XXL can be supplied with additional requirements and limitations

Flatter floor rails – elegant and reduced stumbling hazards

Besides the higher standard floor rails with weinor CleanCase® you can also choose the flat version. This version does not have a CleanCase®. The benefit for you: it is so low that

almost presents no obstacle in transitions – simply accessible! Elegant floor connection profiles that go well with any flooring ensure a nice transition between the floor rail and the patio floor.

Clever CleanCase® – easy cleaning of running rails

The standard floor rail has a practical CleanCase® – for the easy removal of dirt using a hand brush or cloth.

- reliable drainage outside
- also available without CleanCase® with a continuous rail profile

Comfortable foot-operated catch

weinor developed an intelligent fixing mechanism so that the glass leaves remain reliably in the position you want when fully or partly open.

- comfortable to operate without having to bend down
- locking and releasing of w17 easy by applying slight pressure with the foot

High-quality handle and lock versions

The full glass sliding doors can be operated conveniently using the high-quality handle versions.

- standard handles: in stainless steel and the system colour
- cup pull handles in V4A stainless steel

- lockcase and hung bolt: in system colour (A4 stainless steel rust-free lockcase inside, highly corrosion-resistant nickel silver key and profile cylinder), can be locked from the inside, can be locked from both sides as an option

Retrofittable – for virtually every patio roof or veranda

Being a floor-mounted structure, weinor's full glass sliding door wall fits under virtually every patio roof as well as many other roof structures.

- weinor's patio roof can be extended to create a Glasoase®

- no additional costs for structural safety adjustments
- matching profiles from weinor for easy retrofitting
- easy to clean and easily accessible from the outside

WGM Top, Sottezza II, VertiTex II Three perfect sun shades

With the right form of sun protection for your patio roof, Glasoase® or conservatory, the fabric will shelter you from the heat, glare and prying eyes – and also make you feel even more at home. For well-ventilated patio roofs and Glasoasen®, often the only anti-glare protection that you need is an undermounted conservatory awning. A conservatory can quickly become very warm when the sun shines in. This is where a roof-mounted conservatory awning can help provide a pleasant indoor environment. Vertical protection from the sun and prying eyes comes in the shape of our VertiTex II vertical awning.

Frame colour WT 029/60740 | Pattern 3-745 cappuccino/birch

WGM Top – Highlights and benefits

Creating a pleasant climate in the conservatory or under the glass patio roof

The WGM Top can be retrofitted to a whole range of different untrussed roofs. It protects against overheating, thus contributing to a pleasant atmosphere.

- suitable for larger cross sections and dimensions up to 36 m²
- wind-resistant up to wind force 6 on the Beaufort scale
- elegant design without any screws, caps or fixings

Functioning principle of OptiStretch

Clever Stretch and OptiStretch versions

WGM Top Stretch: the consistent tension and fabric position creates a cosy atmosphere.

- **Stretch:** held captive on 2 sides, easy to install, cost effective solution

WGM Top OptiStretch: superb tension with reduced sagging and no light gaps. Improved performance during operation.

- **OptiStretch:** held captive on all 4 sides, no light gaps

Supporting brackets for every requirement

The conservatory awning WGM Top support brackets convince with their high stability and impress with their subtle and almost screwless look. The

awning height can be individually adjusted thanks to the different versions (fixed, adjustable, standard and special version).

Heat and glare protection that stand the test of time

The over roof shading system WGM Top ensures the space underneath your conservatory or glass room does not heat up too much. It stops the sun hitting the glass roof so heat build up is not an issue. The all-round enclosed and robust awning cassette keeps the fabric and other component parts well protected from the elements. You can enjoy superb weather protection for many years.

Quiet and consistent operation

The WGM Top tension system ensures optimum fabric performance and positioning. It includes, amongst other things, a new flat rope and the tried and tested weinor carriage system.

The flat rope is extremely quiet and durable, the weinor carriage system features quiet retraction and extension that is gentle on materials.

Sun, wind and rain sensors

Radio sensors provide maximum convenience. They open the awning automatically when the sun comes out and retract it in the rain and wind.

Available in the following versions:

- sun/wind/rain sensor
- sun/wind sensor
- sun sensor
- wind sensor

WGM Top Stretch/OptiStretch

Max. width 6.5 m with 5 m projection

Max. projection 6.0 m with 6 m width

Frame colour RAL 7015 | Pattern 3-717 coriander

www.weinor.com/sottezza2

Sottezza II/LED – Highlights and benefits

Under glass sun protection for cosy living

The lean form and beautiful fabric of the Sottezza II guarantees a cosy feeling under your patio roof. A huge range of fabric patterns and colours makes the designing a pleasure.

- optically matching for any patio roof
- suitable for retrofitting almost everywhere
- multi-section units also shade large areas

2 versions – taut fabric at all times

Sottezza II is available in 2 designs: Sottezza II OptiStretch enclosed all-round with fabric and the cheaper Sottezza II Stretch with open sides.

- Sottezza II OptiStretch:** completely enclosed on all sides, no light apertures on the side or overhanging edges of fabric
- Sottezza II Stretch:** even fabric positioning, small fabric gap on the sides

Sottezza II OptiStretch – the best all-around fabric tension

Sottezza II OptiStretch is held captive on all four sides. This reduces the risk of fabric sag enormously. The problem of sideways hanging edges is also solved.

- the fabric is positioned securely in the side channel – just like a zip
- no light ingress at the sides

Long evenings with integrated LED lighting

Enjoy long evenings on your patio – the Sottezza II LED provides atmospheric lighting. The cassette with integrated LED lighting blends discreetly into the architecture of the patio roof.

- suitable warm white light
- operating life of 30,000 hours
- highly energy-efficient
- dimmable via remote control using a hand transmitter or Smart Home via smartphone or tablet

Proven technology for optimum fabric performance

The tried and tested tension system also ensures even fabric positioning with the Sottezza II.

- tear-resistant and high-tensile rope

- extremely quiet and easy running
- tried-and-tested tension system over many years

Sottezza II	max. width	max. projection
OptiStretch	6 m	5 m
Stretch	6 m	4 m

Under mounted awnings with a homely feel

The under mounted Sottezza II conservatory awning is an attractive anti-glare screen that is always a good choice below a Glasoase® or patio roof because it provides for ample air circulation. The customisable sizes also make it a good fit for any other rectangular patio roof.

Honoured with:

Innovation award 2016

Frame colour WT 029/80081 | Pattern 3-716 suede

www.weinor.com/vertitex2

Maximum fabric widths in the smallest cassette

With an exterior vertical shade from our VertiTEx II line, you have an anti-glare screen, wind protection and privacy screen all rolled into one. The patented weinor OptiFlow-System® allows us to use a very small and slim cassette on the VertiTEx II – yet it is still big enough to house large awning fabrics. Regardless of whether it's for the pergola awning, patio roof, Glasoase® or conservatory, the VertiTEx II is always the perfect solution.

Honoured with:

VertiTEx II – Highlights and benefits

Modern design – in two shapes

The VertiTEx II is available with different cassette sizes as well as in a square and round version. Making the vertical awning a true asset for the patio roof.

- desired RAL colour in facade quality
- wide range of fabrics from the screens by weinor® collection – including many seamless fabrics without irritating horizontal seams

* even up to 6 meters width

Ultra-small cassette – even for large system sizes

Exclusively from weinor: Thanks to the weinor Opti-Flow-System® the VertiTEx II has the smallest cassette, even with large widths up to 6 metres.

- cassette sizes: 75 mm, 92 mm and 112 mm
- elegant alternative to exterior blinds, roller shutters etc. (no obstructed views)
- dimensions up to 15 m² possible
- with zip, guide rail or rope

Indented rope

Variant with rope – fits almost any situation and application

The VertiTEx II rope version can have the guide ropes indented if required. This is ideal if there is no fixing at either end, for example indented posts.

VertiTEx WeiTop

VertiTEx WeiTop – simple and precise

VertiTEx WeiTop matches perfectly with the gutter of the terrace roof Terrazza Originale or Glasoase® and is possible up to 6 meters width. With this version the guide rope can also be indented.

- dimensions up to 15 m²
- quick and safe assembly, also retrofittable

VertiTEx II Zip with 220 guttering

VertiTEx II Zip version – large width and higher wind stability

When combining the weinor Terrazza Originale terrace roof with the vertical awning VertiTEx II Zip, Terrazza Originale is equipped with a higher gutter. This allows larger spans to be achieved without the need of additional middle posts. In

addition, the Zip technology of this version ensures maximum wind stability.

VertiTEx II	max. width	max. height*
Zip	6 m	3 m
Rail	6 m	4 m
Rope	6 m	4 m

* Max. shadeable area: Zip 15 m², rail and rope 14,4 m²

Which control unit fits your needs?

With conservatory awnings, vertical-sun protection, heating and lighting from weinor, you make the stay in your Glasoase even more pleasant. Various control packages are available to you for its operation.

Basic **

Basic – operation with hard wired switch or automatic weather system

You would like to operate your weinor sun protection comfortably via a hard wired wall switch? Your motor-operated conservatory and vertical awnings are effortlessly extended and retracted with a simple switch. Optionally, an automatically controlled unit can be used with a sun, wind and rain sensor instead of a hard wired switch. Also, the heating and light can be switched on and off using separate hard wired switches.

Comfort ***

Comfort – operation with a remote controller plus dimming heating and lighting

You would like to control your weinor conservatory awning comfortably via remote control from the patio or the house? That's pretty easy with a remote controller. Optionally, the lighting and the radiant heater can be operated with it and even be dimmed. You can also control vertical sun protection or further awnings on the house centrally by this means.

Smart ****

Smart – operation with a smartphone, language assistant or pre-set

You would like to network your weinor conservatory awning, light, radiant heater and further accessories with the further devices in your home and control it from everywhere via smartphone or tablet? That's child's play with the Smart Home Centre Somfy TaHoma Switch! Also if you would like to operate it via a language assistant or a pre-set automatic scenario.

Please note that the weinor BiConnect and Somfy systems cannot be combined.

The right control unit to suit all needs

Whether hard wired, remote control or Smart Home, using a hand transmitter, smartphone or automatic weather control – operate your awnings and accessories really effortlessly with weinor BiConnect or Somfy control units. The LED lighting and the heating system can be dimmed fine-tuned using remote controls or Smart Home. Your weinor retailer will be happy to advise you competently.

weinor certificate of authenticity

Every weinor product is delivered with a certificate of authenticity. Ask your weinor retailer for it!

Important:

All the illustrated equipment is weatherproof outdoor furniture and accessories.

Fabric qualities: weinor awning fabrics meet strict quality requirements and are produced using state-of-the-art production technology. Despite this, blemishes like creases, rippling in the seam and hem area, overstretching in the hem area and honeycombing cannot be ruled out. This has no negative impact on the quality and operating life and are not a reason for rejection. For more detailed information: www.weinor.com/fabric_qualities

Awnings and conservatory awnings: must be retracted during rain and windy conditions – otherwise there is a risk of water pooling on the fabric. Fabrics that are allowed to become wet may show creasing, wrinkling or honeycombing as well as having visible water stains. Mould and mildew damage is also a possibility. If taken away wet the awning should be extended as soon as possible once there are dry conditions.

Frame colours: depending on the frame colour ordered, we deliver all small parts, as well as gear handles and gear boxes in black (similar to

RAL 9005), white (similar to RAL 9016), or in grey (similar to weinor 7319).

Patio roofs and Glasoasen®: Ask a qualified weinor retailer about the causes of condensation formation and any cracking sounds which may occasionally be heard (and how to avoid them from the planning stage onwards).

Please note: The weinor Glasoase® is completely watertight and airtight (e.g. with driving rain or draughts).
